What is the Eduplex? – <https://www.youtube.com/watch?v=xlqdlrLZyg>

## WORKSHOP OVERVIEW

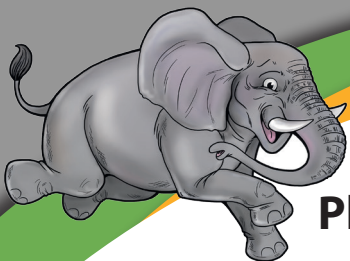

Eduplex is an inclusive mainstream school with the unique focus on including children with hearing loss. During the workshop, professionals and teachers will share their knowledge and experience in relation to evidence-based practice pertaining to:

- Audiological management strategies as foundation for inclusive education, including the role of technology in the classroom.
- An integrated approach to therapy, which combines the use of parent guidance, auditory verbal therapy (AVT), the natural auditory-oral approach (NAO) and traditional speech therapy and how it supports the educational goals of children with hearing loss in a mainstream school.
- Differentiated teaching methods and additional classroom support strategies, which enhances the learning of all learners, will also be addressed by teachers.
- The role and use of music and movement in the education of children with hearing loss.

Participants attending this workshop will benefit from the various learning outcomes but will also gain insights into hearing healthcare facilities in South Africa and the education of children with hearing loss.

## Professional growth opportunities

- Develop an understanding of the nature of audiological service delivery in South Africa, specifically relating to the successful inclusion of children with hearing loss in a mainstream school.
- Tour through a private audiological health care facility. The Ear Institute is the largest hearing health care provider in Sub-Saharan Africa known to apply evidence based practice.
- Gain exposure and insights to the Eduplex Model – a model for inclusion that can be applied worldwide.
